Media release February 13, 2019

Global organic area reaches another all-time high

Nearly 70 million hectares of farmland are organic

The latest global data on organic farming worldwide will be presented by the Research Institute of Organic Agriculture (FiBL) and IFOAM – Organics International at BIOFACH, the world’s leading trade fair for organic food, in Nuremberg, Germany. The statistical yearbook “The World of Organic Agriculture” will be launched on Wednesday, February 13, 2019, from 4:00 to 4:45 pm in Hall Shanghai, NCC East.

(Frick/Nuremberg, February 13, 2019) The year 2017 was another record year for global organic agriculture. According to the latest FiBL survey on organic agriculture worldwide, the organic farmland increased substantially, and the number of organic producers and organic retail sales also continued to grow, reaching another all-time high, as shown by the data from 181 countries (data as of the end 2017). The 20th edition of the study “The World of Organic Agriculture” published by FiBL and IFOAM – Organics International shows a continuation of the positive trend seen in the past years. The annual survey on organic agriculture worldwide is supported by the Swiss State Secretariat for Economic Affairs (SECO), the International Trade Centre (ITC), the Sustainability Fund of Coop Switzerland, and NürnbergMesse, the organizers of the BIOFACH fair.

The global organic market continues to grow worldwide and has reached 97 billion US dollars

The market research company Ecovia Intelligence estimates that the global market for organic food reached 97 billion US dollars in 2017 (approx. 90 billion euros). The United States is the leading market with 40 billion euros, followed by Germany (10 billion euros), France (7.9 billion euros), and China (7.6 billion euros). In 2017, many major markets continued to show double-digit growth rates, and the French organic market grew by 18 percent. The Swiss spent the most on organic food (288 Euros per capita in 2017). Denmark had the highest organic market share (13.3 percent of the total food market).

Almost three million producers worldwide

In 2017, 2.9 million organic producers were reported, which is 5 percent more than in 2016. India continues to be the country with the highest number of producers (835’200), followed by Uganda (210’352), and Mexico (210’000).
Record growth of the organic farmland: 20 percent increase

A total of 69.8 million hectares were organically managed at the end of 2017, representing a growth of 20 percent or 11.7 million hectares over 2016, the largest growth ever recorded. Australia has the largest organic agricultural area (35.6 million hectares), followed by Argentina (3.4 million hectares), and China (3 million hectares). Due to the large area increase in Australia, half of the global organic agricultural land is now in Oceania (35.9 million hectares). Europe has the second largest area (21 percent; 14.6 million hectares), followed by Latin America (11.5 percent; 8 million hectares). The organic area increased in all continents.

Ten percent or more of the farmland is organic in fourteen countries

Globally, 1.4 percent of the farmland is organic. However, many countries have far higher shares. The countries with the largest organic share of their total farmland are Liechtenstein (37.9 percent), Samoa (37.6 percent), and Austria (24 percent). In fourteen countries, 10 percent or more of all agricultural land is organic.

Global organic statistics show the contribution of organic agriculture to the Sustainable Development Goals

According to Dr. Monica Rubiolo from SECO and Joseph Wozniak from ITC “global data on organic production and markets are of high relevance for policy makers and contribute to understanding the importance of organic farming in the different countries.”

“This publication shows our ongoing engagement with transparency in the organic sector” say Professor Urs Niggli, FiBL director, and Louise Luttikholt, IFOAM – Organics International Executive Director. And they add “This publication also demonstrates the contribution of organic agriculture to the Sustainable Development Goals. Overall, the yearbook shows the potential organic farming has to contribute to a sustainable future!”

About FiBL

The Research Institute of Organic Agriculture FiBL is one of the world’s leading institutes in the field of organic agriculture. FiBL’s strengths lie in its interdisciplinary research, innovations developed jointly with farmers and the food industry, and rapid knowledge transfer. FiBL employs some 300 staff at its various locations.

Yearbook "The World of Organic Agriculture"

About "The World of Organic Agriculture"

The yearbook (352 pages) presents the results of the annual survey on organic agriculture worldwide and has numerous tables, graphs, maps, and infographics. Furthermore, it contains reports authored by experts on the organic sector and emerging trends in all regions and selected countries. In addition, background information on standards and legislation, policy support, and the global market for organic food is provided. The book also contains an article about organic cotton and a chapter reviewing key commodities certified by selected Voluntary Sustainability Standards (VSS). Further information and download is available at www.organic-world.net/yearbook/yearbook-2019.html.

Data collection

The data on organic agriculture is collected annually by the Research Institute of Organic Agriculture FiBL in collaboration with many partners from around the world. The results are published jointly with IFOAM – Organics International. The activities are supported by the Swiss State Secretariat for Economic Affairs (SECO), the International Trade Centre (ITC), the Coop Sustainability Fund, and NürnbergMesse, the organizers of the BIOFACH fair.

ORGANIC RETAIL SALES 2017

The largest single market is the USA, followed by the EU (143 billion €) and China. By region, North America has the lead (43 billion €), followed by Europe (37.3 billion €) and Asia.

The countries with the largest markets for organic food are the United States (40 billion €), followed by Germany (10 billion €), France (7.9 billion €) and China (7.6 billion €).

Switzerland has the highest per capita consumption worldwide, followed by Denmark and Sweden.

The highest share of the organic market of the total market is in Denmark, followed by Sweden, Switzerland, Austria, and Luxembourg.

ORGANIC FARMLAND 2017

In Oceania there were 35.9 Mio ha, in Europe 14.6 Mio ha, and in Latin America 8 Mio ha.

The ten countries with the largest organic agricultural areas represent 79% of the world's organic agricultural land.

14 countries have 10% or more of their agricultural land under organic management.

In 2017, over 11.7 million hectares more were reported compared with 2016.
ORGANIC PRODUCERS 2017

The country with the most organic producers is India, followed by Uganda and Mexico.

The five countries with the largest numbers of organic producers 2017

More than 84% of the producers are in Asia, Africa, and Latin America.

Distribution of organic producers by region 2017

There has been an increase in the number of producers by almost 127,500, or over 5% since 2015.
